Professional Summary

UI and product designer with 3+ years of experience designing websites, web apps and design systems for banking, motorsport, e-commerce and education clients. Spent nearly two years embedded at Bank Central Asia (BCA) as a product design retainer, building the design system and visual direction for a business digital banking platform. Most recently at Natuno, led design direction for a private banking website revamp, guiding a designer, and built live prototypes for usability testing and design documentation for developer handoff.

Skills

UI/UX Design, Product Design, Design Systems, Prototyping, User Flows, Information Architecture, Responsive Web Design, Art Direction, Branding & Identity

Tools: Figma, Adobe Illustrator, Claude

Work Experience

Designer (Contract) | Natuno

May 2026 - Sep 2026 | Remote

Main Banking Website Revamp (BCA)

- Created high-fidelity UI designs and independently built a functional live web prototype to support usability testing in Natuno's research engagement.
- Translated design concepts into responsive pages with realistic navigation and detailed interactions so participants could explore the proposed experience and complete research tasks.
- Iterated on the design and prototype from ongoing client feedback, refining layouts, interactions and imagery.

Private Banking Website Revamp (BCA Prioritas)

- Led design direction for the revamp, working with client stakeholders and the internal team to refine content, sitemap and art direction.
- Guided a designer on visual direction, page design and imagery while doing hands-on design work to keep quality high and delivery on schedule.
- Independently developed the functional live web prototype, turning the team's designs into responsive pages with detailed interaction behavior.
- Built web-based documentation of components, design tokens, assets, sitemap and user flows as a shared reference for stakeholders and developers.

Designer (Embedded Product Design Retainer) | PT Bank Central Asia Tbk (BCA)

Jul 2024 - May 2026 | Jakarta, Indonesia | On-site

Ocean by BCA, a new digital banking platform for business customers

- Architected and extended the product design system: designed core UI components, expanded the color token library and structured the base design system file.
- Audited and fixed taskforce contributions to the design system: streamlined dozens of component documentation entries, restructured component architecture for scalability and realigned components with actual product workflows.
- Drove the platform's visual direction, advocating a dark glassmorphism aesthetic with a deep blue palette that was adopted as the product's design foundation.
- Redesigned the homepage from the ground up over 3 months: worked with the BA and product lead on content strategy, did the full visual design, crafted the hero background animation and delivered an interactive prototype for developer handoff.
- Defined the foundational form structure for the Digital Onboarding flow, piloted across 3-4 product lines to validate the new interaction template.
- Collaborated with the client on branding and art direction explorations for the platform and its ecosystem.

UI Designer (Freelance) | Mandalika Grand Prix Association

May 2023 - Jul 2023 | Remote

- Designed the MotoGP Mandalika website from scratch, working closely with the project manager to match the client's vision.
- Simplified the information architecture and ticket selection flow to make them easier to use.

UI Designer (Full-time) | Billionaire Store

`Jan 2022 - Aug 2022 | Bandung, Indonesia`

- Designed UI at both component and screen level, including the online store leaderboard page.
- Restructured design assets for scalability and built a lightweight design system, improving design-to-development handoff.
- Created social media content.

UI Designer (Freelance) | Universitas123

`Nov 2021 - Apr 2022 | Remote`

- Redesigned the search flow of a university and scholarship discovery platform, making relevant information easier to find.
- Delivered responsive designs for desktop and mobile.

UI Designer (Part-time) | Padepokan Tujuh Sembilan

`Nov 2019 - Jul 2020 | Bandung, Indonesia`

- Designed and redesigned 7 web-based management systems across industries including field service, refueling terminals and school admissions.
- Worked directly with the project manager to identify and implement UX improvements for end users.

UI Designer (Intern) | Padepokan Tujuh Sembilan

`Jul 2019 - Sep 2019 | Bandung, Indonesia`

- Developed a website for a private high school client.
- Introduced Figma to the team, streamlining the design-to-development workflow.

Education

Politeknik Negeri Bandung | Diploma 3 (D3), Informatics Engineering (Teknik Informatika)

`Aug 2017 - Sep 2020`

- Final project: designed and developed Ludira, a blood donor search app in Flutter, covering UX design and development end to end.
